Relevant Education

Cibertec - Lima

Computer Science and Information Technology

Graduate / Degree in progress

Experience

Frontend Developer - COPACO

November 2025 - Present

- Develop and maintain key ERP modules, including orders, dispatches, invoicing, and credit/debit notes.
- Implement interfaces, business logic, and API integrations using React and TypeScript.

Medical Interpreter – Bilingual Language Services

October 2022 – April 2025

- Interpreted between English and Spanish, ensuring accurate communication between patients and healthcare providers.
- Assisted medical providers with specific requests during scheduled sessions.
- Worked under pressure in situations where accuracy and speed were essential.

Projects

Axon: Web-Based Sales and Inventory Management System

September 2026 - Present

- Web-based system focused on automating operational and commercial processes for micro and small businesses, developed as a thesis project.
- Designed and implemented the frontend architecture and modular navigation for master data and commercial management modules.
- Implemented authentication, data management, and styling using NextAuth, Prisma, Supabase, and SCSS.

Strive: Digital Content Store

September 2025

- E-commerce platform focused on downloadable video game content.
- Developed the interface using React.js, TypeScript, Next.js, and SCSS for styling.
- Implemented cart and purchase management with database persistence.
- Designed a responsive interface optimized for different devices and screen sizes.

Some of my other projects are available on my Github.
